OPV Video Player / Viewer

Use OPV Player (viewer) to preview video files created by Optec or Optec ME PRO software. Each file will have .OPV extension.

To begin, double click “OpvPlayerSetup.exe” file and follow setup wizard to complete the installation.

Optec PlugIns is required. Please click next to complete installation.

View an OPV video file.

Once the OPV Player (viewer) is installed on the computer, OPV files (with .opv extension) on the computer will auto associate to the player.

To view the file, simply double click on the .opv file and OPV Player (viewer) will auto launch and playback the video file.

Use “Open” button to browse and view additional files.
